

PMI BUILDERS

BACKGROUND Precise Measurements Inc., which was founded in 2001, specializes in renovations that include residential additions/alterations, kitchen and bath, and small-scale commercial renovations.

OWNERS This is a husband-and-wife team. David Wheeler is a finish carpenter by trade, with 16 years of experience. His first priority is to exceed your expectations. Misty Wheeler holds a master's in communication; she is responsible for customer service and public relations with clients, architects and designers, vendors and subcontractors.

THE TEAM The company began with one employee and has grown to a crew of five—the company's small size is key in retaining the personal touch.

PHILOSOPHY The first priorities are exceptional craftsmanship and superb, personal customer service.

KNOWN FOR Taking the potential stress and upheaval of remodeling and turning it into a positive experience.

BEST PART OF REMODELING "We like the end result; seeing the dramatic change in the home and how that changes the way people live," Misty says.

BEST THING A CLIENT HAS EVER SAID "Wow! What a beautiful job you did in my kitchen. It is absolutely gorgeous. I must say your customer service and quality of workmanship are next to none."*
